

How is Your Blood?

I had a malignant breaking out on my leg below the knee, and was cured sound and well with two and a half bottles of S. S. S. Other blood medicina had failed to do me any good.

WILL C. BEATTY, Yorkville, S. C.

I was troubled from childhood with an aggravated case of Tetter, and three bottles of S. S. S. cured me permanently.

GOVERNOR JOHN B. GORDON

Sends the Following Expressions of his

Views on the Force Bill.

ATLANTA, Ga., July 25.—The Philadelphia Press requested Governor Gordon to give his views concerning the force bill, and he sent the following:

"To The Press, Philadelphia, Pa.: A compliance with your request, for my reasons for believing that the force bill necessarily means injustice to any section of the country," requires more time than I now can command. I give, however, in brief, a few of these reasons.

"1. The proposed law, while ostensibly

national, is really sectional; that the sole excuse for such legislation is the

correction of election frauds claimed to

be perpetrated at the south. Neither the author nor any supporter of the bill will pretend that any such law would have been no south, or had the south been solidly Republican instead of solidly Democratic. No candid supporter of the measure will assert that he expects northern states to be overrun by federal supervisors as will be the southern states. The law is, therefore, sectional in its inspiration, sectional in its object, and will be sectional in its operation.

"2. It is unjust to the south, because

based on the false assumption of suppression of the negro vote in the face of the

fact that in 1880 there were over 400,000

more voters in Republican states north,

who did not cast a ballot, than there

were in all the Democratic states, includ-

ing the south.

"3. In 1888 the number of voters intimated, who did not cast a ballot in the

northern Republican states, exceeded

the same class in all Democratic states

by more than 1,000,000.

J. BULL IN AFRICA.

Progress Made by the British
In the Dark Continent,

As Shown By the East African
Company's Report.

The Organization Now has Control of
550,000 Square Miles of Territory,
Four Thousand Slaves Released by
Stanley's Treaties—Hundred Immigratio-

nation to Africa to be encouraged.

BRITISH OPERATIONS IN AFRICA.

Annual Report of the British East

African Company.

LONDON, July 24.—The British East

African company has issued its annual report, which, in these times of eager

interest in all things African, attracts

its full share of attention. The com-

pany's field of action is shown by the

statement in the report that the region

subject to the operations of the organi-

zation has an area of 750,000 square

miles.

The sea frontage of the company's

dominions extends a distance of 4,000

miles, with ample possibilities in the

way of harbors and other facilities for

commerce. Under the recent treaties

made by Mr. Stanley 4,000 slaves have

already been liberated. The company

proposed shortly to construct a railway

to Victoria Nyanza. One of its most

important projects is the encouragement

of Hindu migration into Africa, and it

hopes within a reasonable time to

secure the peopling of extensive

tracts of fertile land by Indian culti-

vators.

SPITZBERGEN.

Swedish Scientific Expedition to Go There

This Summer.

A Swedish scientific expedition has

been sent to Spitzbergen in the hope

that the ice condition will permit a con-

tinuation of remarkable work the

Germans did in these waters last year.

Though Spitzbergen has been visited

annually for over three centuries by

whalers and traders, it is only within

the past five years that the world has

had any adequate notion of its eastern

outline and of islands that form the

eastern part of the archipelago. The

expedition is to be conducted by

two men, Dr. Carl Anton Larsen

and Dr. Gustaf Ekman, who are to

travel in pairs, one to the north and

one to the south, and to meet in the

middle of the archipelago.
